PRESS RELEASE

Mach Machine Continues Expansion of Production Capabilities

Hudson, MA; January 7, 2016: Mach Machine, Inc. continues to expand its production capabilities with the addition of a Haas VF-2SS. This state-of-the-art machining center boasts a 30HP, 12000 RPM spindle, servo-driven, side-mounted tool changer with a tool-to-tool time of 1.6 seconds, rapid traverse movement of 1400 inches per minute and high speed machining used in complex multi-axis machining. Mach Machine's president, Dan Olsen says, "The acquisition of this machine is a direct response to the increasing demand for smaller, high volume parts. The VF-2SS will be able to reduce cycle time by over 30 percent over its predecessors, enabling us to be even more competitive with our pricing and be able to increase throughput through our machining center".

If you have any production requirements and would like to receive a quote, you can contact us at sales@machmachine.com or give us a call at 978-274-5700.
